Installation

To use MaskNornBengal.agents with Creatures 3:

Make sure that Update 2 for Creatures 3 (<http://support.creaturelabs.com/>) is installed.

For Creatures 3 standalone (Docking Station not installed):

Put MaskNornBengal.agents into Creatures 3\My Agents folder.

For Docking Station standalone (Creatures 3 not installed):

Put MaskNornBengal.agents into Docking Station\My Agents folder.

For Docking Station, Capillata only or docked with Creatures 3 (Creatures 3 installed):

Put MaskNornBengal.agents into Creatures 3\My Agents folder, if you like to use the Mask Bengals in Creatures 3, too, otherwise put it into Docking Station\My Agents folder.

How it works

All files needed to play with the Mask Bengals will be placed in the right folders as soon as the breed "Jewels Mask Norn (Bengal)" is selected on the egglayer(Creatures 3) or Muco (Docking Station) and an egg is going to be created.

Depending on your configuration of Creatures 3 and/or Docking Station all info files will be placed
either in Creatures 3\Genetics and Creatures 3\My Creatures
or in Docking Station\Genetics and Docking Station\My Creatures.

Description

Files added by MaskNornBengal.agents:

- the original **Mask Norn Bengal sprite set created by Jewels Parker**, now using Geats slot M instead of Norn slot M. We decided to rewrite the sprites to keep Norn slots free for existing or upcoming breeds made by

- Creature Labs.
- **attachment files** (BodyData)
- **masknornbengal.gen** which is the full norn.expressive.bengal.47 genome by Creature Labs except for the appearance genes which have been edited (genus: Shee, slot: M).

We want to emphasize that

Jewels Parker/Scientist of the Mask

(<http://jewelscr3.tripod.com/>)

(even if deceased) still owns the copyright on her

Mask Norns (Mask Bruins, Mask Bengals, Mask Civets),
Mask Grendels,
Mask Ettins,
Halloween Norns,
Multi Malay Norns and
Pink Alba Norns.

Before she passed away, Jewels gave explicit permission to

Creatures France (<http://creaturesfrance.free.fr/>) - French Version, and

Creatures Unlimited (<http://connect.to/cu/>) - German Version

to host her Creatures:

**"Due to a growing number of people asking to host my norns; please don't ask:
There are only two sites that I have allowed to host any of my creations or conversions: They are the
German Site and the French Site."**

(Jewels on her site <http://jewelscr3.tripod.com/>)

You don't need to ask for permission, if you want to pass this agent on to your friends (but please don't change any part of it). But you have to ask for permission from the authors, if you want to place this agent or any other agents made by **Creatures Unlimited (CU)** on your own web site.

pasto/Creatures France (<http://creaturesfrance.free.fr/>) - for translating this info text from English into French

Special thanks to **emmel**/Outer Albia (<http://go.to/outeralbia/>): Without the advice we got from "Outer Albia Support" this agent probably never would have been completed.

*For several reasons, Jewels was very addicted to her beloved creatures.
When she asked us to host them on our German Creatures site giving them a good home we proudly
did.*

In memory of Jewels we'll continue doing so.

Have fun with Jewels' Mask Bengal Norns. :-)
